Senator David Vitter  
1651 Louisville Ave. – Suite 148  
Monroe, LA 71201

Dear Senator Vitter,

My name is *exempt* and I live in Farmerville, LA on a farm consisting of a little over 100 acres of land which I was born, raised and lived for 69 years, land that has been used for farming for nearly 100 years.

My reason for writing you this letter is to express my deepest concern and frustration due to the fact that Foster Farms Poultry, one of the largest poultry integrators in the United States, is located approximately one mile behind my property, are polluting my land, as well as other landowners, with excessive amounts of nitrites, phosphorus, fecal coliform, ammonia, chloride, and other constituents of concern. Environmental experts have proven without a doubt there are no other point sources. This same polluted water also runs into Lake D'Arbonne, a well known and popular lake used for recreation.

Foster Farms have consistently violated their permits since taking ownership of the plant in May 2009. Foster's emissions exceed the Federal Primary Drinking Water Standard of 10 milligrams per liter resulting in the water not being safe for human or livestock consumption. They also exceed the EPA guidelines for recreational contact and fishing, and for human and livestock consumption. These exceedances and permit violations are unreasonable and blatantly negligent.

Unfortunately, I am currently in the middle of litigating this matter in federal court because Foster Farms denies and fails to take responsibility of this obvious and egregious problem.

Foster is a self reporting agency and the support from the EPA has been lacking and "overlooking" with only a "slap on the hand" attitude.

As a farmer and former chicken grower, I am a supporter of industry and promoting businesses and jobs and believe in being a good neighbor; however, I am not a supporter of big business's who come into communities and take advantage of the landowners, the growers, state funding, tax exemptions, the polluting of creeks, streams, drinking water, air, and become the employer of a large inmate labor force.

It is essential that the leaders of the local communities and of this state take a stand against such issues and hold the corporate giants accountable for their actions. Otherwise, the polluting

and negligence will continue. Any assistance your office could offer in addressing and resolving this problem would be greatly appreciated.

I can be reached at

*exempt*

.. Thank you in advance.

Sincerely,

*exempt*
